DETAILED ACTION***Election/Restrictions***

Applicant's election with traverse of group I comprising claims 1 – 11 in the reply filed on 11/14/2005 is acknowledged. The traversal is on the ground(s) that no serious burden would be placed upon the examiner during examination. This is not found persuasive because classification of subject matter is merely one indication of the burdensome nature of the search requirements and a serious burden on the examiner may also be shown by appropriate explanation of the field of search (see MPEP § 803). As discussed in the restriction requirement, the different inventions incorporate different feature requirements that would involve different considerations in determining patentability. Clearly, different searches and patentability determination issues are involved in the examination of each invention. Claims 11 – 20 have been withdrawn from consideration. The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 – 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 – 10 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are:

Art Unit: 1743

Regarding claims 1 and 10, the claimed method is incomplete. It is unclear as to what specific component constitutes the "virtual wall" of the interface port. Is there a liquid reagent already disposed within the channel that forms the virtual wall? Does the virtual wall comprise a thin layer of material covering the interface port or does it fully occupy the interior channel?
